Press Flowers in 4 Simple Steps

The Official Hwabelle Quick-Start Visual Operating Manual

Framework: CHOOSE → ARRANGE → PRESS → CREATE • Website: hwabelle.shop

The 4-Step Picture-Book Framework

1. CHOOSE — Peak Fresh Blooms

Harvest flowers mid-morning after dew evaporates. Pick blooms 80%–100% open with zero moisture or browning. Trim stems flush with sharp floral snips.

2. ARRANGE — 5-Layer Stack

Lay the acrylic plate, cardstock board, sponge pad, and blotter paper. Arrange flowers face-down with 0.5" spacing. Top with blotter, sponge, and cardstock.

3. PRESS — Symmetrical Torque

Place the clear top plate, look through to verify petal alignment, insert corner bolts, and tighten wing nuts evenly in an X-pattern until sponges compress firmly.

4. CREATE — Archival Framing

Cure for 1 to 3 weeks in a cool dark closet. Test with the Touch Test (feels like dry parchment). Lift with tweezers and mount in double-pane UV floating glass.

Hwabelle Press Kit Anatomy & Specifications

COMPONENT	SPECIFICATION	FUNCTION
Large Acrylic Press Plates	10" x 10" (Dual 6mm Clear Acrylic)	360° transparent view and warp-free flat pressure for full bouquet layouts.
Pocket Acrylic Press Plates	3" x 3" Portable Press	Compact field press for garden walks, hiking, and travel foraging.
Heavyweight Blotting Sheets	250gsm Pure Cellulose	Rapidly wicks moisture away from petal cellular walls to prevent browning.
Sponge Compression Pads	High-Density Open-Cell Foam	Cushions petal curves and distributes uniform torque across varying thicknesses.
Solid Brass Hardware	4 Corner Precision Bolts & Wing Nuts	Ensures multi-point flat clamping pressure that never loosens over time.

Care & Maintenance

- **Sanitizing Plates:** Wipe acrylic plates with a soft microfiber cloth and mild soapy water. Never use abrasive scrubbers or harsh ammonia-based solvents.
- **Reusing Blotters:** If blotting paper is damp but clean, dry flat on a rack in a warm room before reusing. Replace discolored sheets.
- **Storage:** Store the assembled press inside the included protective felt pouch away from direct heat and sunlight.
