HWABELLE BOTANICALS

Pressing Daisies and Clover

A calm, modern guide to preparing fresh flowers for the Hwabelle press.

Fresh flowers, carefully arranged, beautifully remembered.

DAISY AND CLOVER EDITION

WELCOME

A simple botanical rhythm

Daisies bring recognizable centers and bright petals. Clover adds a small, leafy counterpoint. This guide keeps the pieces distinct so the finished composition stays crisp and easy to use.

01

PICK

Choose dry, healthy flowers.

02

PREPARE

Separate pieces and remove bulk.

03

ARRANGE

Place every flower with space.

04

PRESS

Close the stack evenly.

05

REVEAL

Lift the dry details slowly.

THE BOTANICAL PALETTE

White daisy | Green clover | Golden centers | Cream paper | Clear acrylic | Brass hardware

Before you begin

A calm setup makes the pressing process easier to control. Gather everything before the flowers touch the paper.

DRY FLOWERS

Work with flowers that are dry to the touch. Surface moisture can mark the paper and slow drying.

CLEAR SPACE

Use a clean, level table with enough room to keep each flower visible and separate.

FULL LAYER SET

Have blotting paper, padding, the clear plates, and all four knobs ready.

GENTLE HANDS

Handle petals, leaves, and fine stems by their edges whenever possible.

A prepared table protects delicate details.

01 PICK

Choose fresh specimens

HOW TO

Select dry daisies with clean petals and clover sprigs with intact leaves. Handle the flowers by the stem or edge to keep their surfaces clean.

CRAFT NOTE Choose only what you can use and leave plenty for the meadow.

02 PREPARE

Clear the bulky parts

HOW TO

Separate the daisies and clover on clean blotting paper. Remove thick stem sections and flatten any raised leaves without bruising the flowers.

CRAFT NOTE A level specimen makes a more even press.

Give every piece space

HOW TO

Place daisies face up and spread the clover around them as small accents. Keep stems from crossing and avoid stacking one flower over another.

CRAFT NOTE Negative space helps the daisy centers stay clear.

Tighten corner to corner

HOW TO

Lower the cover sheet and clear top plate. Align the four brass bolts, then tighten the four black knobs in small, alternating turns.

CRAFT NOTE Even pressure protects the outer petals and delicate clover leaves.

Keep the centers crisp

HOW TO

Wait until the pieces feel dry and papery. Open the press slowly and move the daisies and clover with a thin card before arranging them in a frame or card.

CRAFT NOTE Store finished flowers flat, dry, and away from direct sun.

Finish and protect

Pressed flowers are thin and delicate. Give them a stable home once they leave the press.

LIFT SLOWLY

Open the plates gradually and peel paper away from the flower.

MOUNT FLAT

Use archival paper or a smooth card beneath fragile petals.

STORE GENTLY

Keep finished pieces flat, dry, and away from direct sunlight.

MAKE IT YOURS

Try a card, bookmark, frame, journal page, or seasonal collection.

Press with care. Keep what matters.
